framing, collages and family albums.

If you have a family album, you're more organized than 70 percent of America.

Most don't have time to arrange their photos and put them in some kind of order. Instead, they usually are placed sporadically in boxes or left in the kitchen junk drawer.

Others put together photo albums that could rival Martha Stewart. Either way, everyone takes pictures - throughout your lifetime, you will accumulate a ton of snapshots.

Today, memorabilia making has become easier and more advanced. With digital cameras,

Photography is a wonderful invention and pastime. It captures our experiences and memorializes them in fantastic color fit for

scanners and hefty hard drives, the creation, storage and distribution of photos is easy and convenient.

Digital cameras have revitalized the joy of photography. The flexibility and quality of using

a digital camera to capture those special moments is unsurpassed. But when it comes to viewing and sharing your digital photos and videos at home, most people are limited to sitting 3 feet away from their 15-inch computer monitor. Because many have much larger TV screens, why not enjoy the size and clarity of your big screen TV for viewing your prized, high-quality digital images and videos? Now you can. It's ShowTime.

X10 Wireless Technology, Inc., has released a unique wireless system to broadcast digital pictures on your television screen for hours of family entertainment. The new ShowTime Kit features X10's 2.4 GHz technology and wizard-based software that makes it possible for kids and adults to enjoy their favorite images and movie files - and you can even create photo albums.

The greatest feature of this system is the RF remote control. This simple device packs a

WHAT THE GADGET GUY THINKS

Utility		Easy to set up - no wires, and good resolution.
Ease of Use		The remote is extremely easy to learn.
Practicality		Saves space and helps organize your images.
Portability		The kit is tiny - you can transfer it to any PC.
Cost		X10 products are affordable, high-tech products.
Coolness Factor		Makes the slide projector obsolete.

punch. The familiar design and control buttons enable anyone to view select albums, zoom in or out, print and even send e-mail attachments to family and friends. You can show off thousands of photos and videos all at once and scan to find what you want with a push of a button. Then e-mail, bookmark or print as you watch. ShowTime is a great activity during parties and get-togethers, too.

The ShowTime kit is designed for do-it-yourselfers and tech enthusiasts seeking a system that can be set up in minutes and requires no additional power or equipment. The included digital camera is perfect for beginning digital photography buffs.

"Anyone can relive activities with family and friends using ShowTime. That should tell you how easy it is to operate this system," said Alex Peder, president of X10 Wireless

Technology, Inc. "The best part about ShowTime is the wireless factor, eliminating the hassle with a floppy disk or zip drive." Peder continued. "All you need is the remote control and a comfortable couch for hours of fun and entertainment."

Using the special zoom button, you can select a desired area on the image to zoom into faces or scenery for even better viewing. The complete one-camera ShowTime kit includes the ShowCam digital camera, a wireless transmitter and receiver, USB video capture adapter, the ShowTime remote control, a power supply and software download.

If you want to get a handle on your mountain of memories, trade in your storage boxes for ShowTime and benefit from all of the photos you've taken throughout your life.

The kit is available for \$199.99 at www.x10.com or by calling toll-free at (800) 675-3044.
