

Extra eye to catch a thief

The Gadget Guy

David Novak

Let's say you're sitting quietly in your home by a roaring fire reading a romance novel. Suddenly, you hear a thump. You check the window, peering out in the dark only to see no one

around but eerie looking tree limbs gently flapping in the wind. You return to your book. You hear it again, only now it sounds like a window in the house is being broken. This could be a possible burglary or vandal

It's no secret that there are grease balls out there who would rather earn a living using your money and valuables than their own. The national crime report offers statistics that suggest that while murder is down, burglary and grand theft are up.

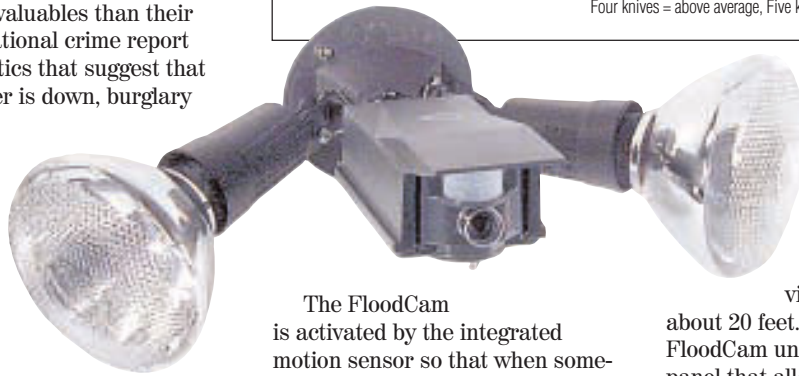

As theft has gone up, so has the need for security system and surveillance. The Company X10 is no stranger to the security industry. They develop some of the most advanced and affordable security systems available. Take for instance their new FloodCAM, an amazing weather-proof wireless color video camera with built-in 2.4 Ghz transmitter and motion sensor built into a dual floodlight system with casing.

WHAT THE GADGET GUY THINKS

Utility		Nabs the bad guys. Sometimes the picture is a little fuzzy if you don't have the transmitter positioned correctly.
Ease of Use		Very easy to install. If sending images to your PC, your computer must be on.
Practicality		If you're looking for a security system with video, this is a great solution.
Portability		All components are small and easy to assemble and disassemble.
Cost		A video security system for \$79? Are you kidding me?
Safety		Each bulb runs at 150 Watts. The wireless feature prevents the installation of dangerous wiring jobs.
Coolness Factor		Provides peace of mind, and looks pretty high-tech too.

The Gadget Guy uses a five knife rating system. Visit The Gadget Guy online at www.thegadgetguy.50megs.com.

One knife = poor, Two knives = below average, Three knives = average, Four knives = above average, Five knives = excellent

The FloodCam is activated by the integrated motion sensor so that when someone approaches your home, the floodlights (bulbs not included) come on, turning scary night into blazing day, and the camera catches the startled intruder on video. The camera transmits its picture over a built-in 2.4 Ghz transmitter to an option video receiver (included with the Complete Kit), which you connect to a TV anywhere in your home. The FloodCam sends the wireless signals, even through walls, up to 100 feet so you can watch and record all the action.

The Secret behind the FloodCam is the smart built-in wireless motion sensor. The video camera always turns on when motion is detected, and the floodlights always turn on when it is dark and motion is detected.

Integration and ease-of-use are the keys to this product. This is a cinch to install, and you're up and running in no time. The camera sends data to the transmitter, and ultimately to the wiring in your house that feeds to your VCR recorder. This provides you

physical evidence without you even trying.

The FloodCam is weatherproof, has a 60 degree field of view, and its range is

about 20 feet. Underneath the FloodCam unit is a hidden control panel that allows you to easily configure all the settings. Set the Channel to the same channel on your Video Receiver. The floodlight control function allows you to detect motion at all times (Light) or only when it gets dark (Dark). Using the Time Delay dial you can adjust how fast the camera turns off after motion is detected. The Camera Mode switch lets you set HOW the camera responds to motion and X10 controllers. Using the two dials at the bottom, set the camera's unit code and house code.

With the NEW X10 FloodCam™ you can instantly shine powerful floodlights on any intruder and instantly capture all the action on videotape or with your PC. The FloodCam combines the best of X10 surveillance and automation technology together in one ultra-powerful solution.

Purchase the FloodCam for \$79.99 or the complete FloodCam Kit with free VCR Commander II for \$129.99. Call X10 at 1-800-675-3044 or visit www.X10.com to order.
