

YOU COULD SPEND NEW YEAR'S EVE  
AT THE PLAYBOY MANSION!

## Flash her!

X10 Ninja  
Pan 'n' Tilt  
Camera  
\$260

### Focal point:

This great surveillance camera lets you keep an eye on different parts of your house or yard -- or girlfriend. The camera has a 2.4 GHz transmitter that offers wireless connection between the camera and the viewing monitor. The camera head allows you to pan and tilt to check out different parts of the viewing area. And it's easy to use: Just plug into the RCA inputs on almost any television set, and you're ready to watch and record the action. It's James Bond technology in everyone's price range.

### Pros:

Cool camera at reasonable price. The small size makes it easy to conceal - if you're into that kind of thing.

### Cons:

The range is somewhat limited.

### Dirty pictures?

And how! You can easily record yourself and your woman getting down. The six preprogrammed scene modes allow for some athletic sex without you disappearing off-camera like you see in those "amateur" home videos.
