FOR TODAY'S LIFESTYLE

See and Record Day and Night!

Our day/night surveillance command system completely reinvents the concept of safety and security.

The powerful XCam2 WideEye Camera and NightWatch low-light camera broadcast live video to your TV or VCR, giving you total day and night surveillance with a chime alert whenever someone comes near! Flip between camera feeds just like changing channels on your TV with the camera remote controller!

This complete motion-activated surveillance system includes a VCR Commander II that records "only the action" while you're away.

Day/Night 2-Camera System

Ref	Quant.	Item #	Descrip.
